Volunteers needed for the world’s first EXPLORER PET/CT study

We are recruiting healthy volunteers to participate in total-body imaging study using EXPLORER.

Healthy men and women, 18 years of age or older, who have a primary care physician.

The study involves multiple visits including screening/consenting, blood testing, EXPLORER PET/CT, CT and MRI imaging sessions; a single study visit can last up to 13 hours.

UC Davis EXPLORER Molecular Imaging Center
3195 Folsom Blvd., Sacramento, CA 95816
and UC Davis Medical Center

There are no direct medical benefits from participating in this study and there are risks related to radiation exposure and iodine contrast media administration.
