Volunteers needed for the world’s first EXPLORER PET/CT study

We are recruiting healthy volunteers to participate in a total-body imaging study using EXPLORER.

WHO:
Healthy men and women, 18 years of age or older, who have a primary care physician.

WHAT:
The study involves multiple visits including screening/consenting, blood testing, EXPLORER PET/CT, CT and MRI imaging sessions: A single study visit can last up to 13 hours.

WHERE:
UC Davis EXPLORER Molecular Imaging Center
3195 Folsom Blvd., Sacramento, CA 95816
and UC Davis Medical Center

BENEFIT/RISK:
There are no direct medical benefits from participating in this study. There are possible risks related to radiation exposure and iodine contrast media administration.
